

VertexERP AI — API Reference Manual

Complete REST API Endpoint Catalog & Schema Definitions

1. OpenAPI / REST Gateway Specification

VertexERP AI exposes 75+ RESTful API endpoints adhering to OpenAPI v3 specifications. All endpoints return RFC 7807 structured JSON responses and require Bearer OAuth2 JWT authentication.

2. Router Endpoints Summary Table

Endpoint Path	Method	Module	Description
/api/v1/auth/login	POST	Identity	Authenticate user and issue JWT bearer token
/api/v1/auth/register	POST	Identity	Register new organization tenant and admin user
/api/v1/organization	GET/POST	Organization	Retrieve or update tenant metadata and settings
/api/v1/employees	GET/POST	HR Platform	List or onboard employees with RBAC check
/api/v1/crm/customers	GET/POST	CRM Platform	Manage customer profiles and sales contact lifecycle
/api/v1/inventory/products	GET/POST	Inventory	Query product catalog, stock levels, and SKUs
/api/v1/finance/invoices	GET/POST	Finance	Create double-entry ledger invoices and payments
/api/v1/manufacturing/orders	GET/POST	Manufacturing	Issue shop floor production orders and BOM routes
/api/v1/analytics/dashboards/executive	GET	Analytics	Aggregate executive KPI metrics and YoY revenue
/api/v1/rag/search	POST	Enterprise RAG	Execute hybrid vector search across uploaded docs
/api/v1/copilot/query	POST	AI Copilot	Natural language agent assistant tool execution
/api/v1/ml/models	GET/POST	ML Studio	Train, evaluate, and promote machine learning models
/api/v1/observability/health	GET	Monitoring	Real-time APM telemetry, Redis & DB health check

3. Common Response Envelope Standard

```
{
  "success": true,
  "data": { ... },
  "message": "Operation completed successfully",
  "timestamp": "2026-08-01T21:50:00Z"
}
```
